

Sailors for the Sea Portugal establishes strategic partnership with the City Council of Lisbon

Following the Sailors for the Sea Portugal vision, aiming to be the reference in Portugal in the sustainability of oceans and seas, it was with great satisfaction that today we established the partnership with the City of Lisbon.

Based on the structural axes of the Sailors for the Sea Portugal, Sea, Education and Sport, this partnership will provide an involvement between the two institutions in key activities of the SFS Portugal.

To increase awareness and environmental education to more young people by KERP program (Kids Environmental Lesson Plans) and bringing the action of the city's Marine Clubs with the Clean Regattas program where the SFS Portugal will seek to build sustainable paths proposing to make a various number of regattas developed in extensive river front, involving Lisbon, are clear goals for both institutions.

The City of Lisbon, strategic by its connection to the Sea, obvious center of national decisions as the capital of Portugal, the European country with the largest ZEE in Europe, will be a key partner for a natural expansion of the mission of SFS Portugal to the whole country.

**Like drops in the ocean,
sailors and boaters are individuals.
But together we're creating
a powerful wave of change that is
sweeping the globe.**
